**[Request Ready-to-Install
Information Kit Now!](#)**

Ready-to-Install products save REAL DOLLARS where they count most – at the planning, staging, and installation-level!

Advantages of Orbit's Ready-to-Install solutions include:

- ✓ **Rough-in most jobs without doing takeoffs or looking at the drawings.** It may sound hard to believe, but it's true.
- ✓ **Save almost 1 minute per assembly!** With Ready-to-Install products, there's no need to attach boxes, rings, pigtails or brackets. Take it out of the package, install it, and you're done!
- ✓ **Accomplish nearly all of your rough-in** with only a handful of part numbers!
- ✓ **Custom packaging available for bulk orders.** Tell Orbit exactly how to pack your Gaylord box, and where you want it shipped (including exact floor and room number!)
- ✓ **Minimize planning.** Specify just a few Ready-to-Install products that check-off every type of rough-in your plans call for!
- ✓ **Simple and easy procurement.** Order these pre-assembled solutions as one part number. They're always in-stock (no back orders or extra lead time!)
- ✓ **Slash shipping and handling costs.** Instead of separate packages for boxes, brackets, and rings, Ready-to-Install products come as one package. Easy to stack. Saves a lot of truck space!
- ✓ **Inventory made easy!** Ready-to-Install products come to your job in clearly-marked packages. Your crew will know exactly what's inside, and where to install them.
- ✓ **Eliminate job site waste!** Screwing rings, boxes and brackets together on the jobsite leaves enormous piles of scrap packaging. That creates tripping hazards, and costs you in cleanup time. Eliminate that waste with Ready-to-Install products!
- ✓ Standardize your crew's mounting solution for every job (key to compound efficiency).
- ✓ Ensure *predictable outcomes* and expectations on every job.

Product Videos

Demonstration videos featuring Ready-to-Install components

Ready-to-Install boxes and brackets feature exclusive Orbit prefab components. Watch the videos below to learn more about these versatile, time-saving components.

Universal Mounting Adapter with Back Support (UMA-LVBS)

Orbit's patented [Universal Mounting Adapter with Back Support](#) (UMA-LVBS) is the featured component on all [LVBS Series box/bracket assemblies](#). Attach the electrical junction box direct-to open or closed sides of a wall stud.

Mount LVBS Series between any 15" ~ 25" wall studs with Orbit's [Simple Support Bracket for up to 5" Boxes](#) (SSB-T5).

UMA-LVBS features integrated back support for 2-1/2" and 3-1/2" stud depths. Increase back support for up to 6" stud depths with [Far Side Support Extender](#) (FS-456-EXT).

Universal Mounting Adjustable Box (UMAB Series)

UNIVERSAL MOUNTING
ADJUSTABLE BOX

orbit
Orbit Industries, Inc.

UMAB Series

PATENTED

ROHS

UL

Orbit's patented [Universal Mounting Adjustable Box](#) (UMAB Series) is the best way to mount extra deep 4" square boxes. Loosen two outer screws to **adjust the box depth from flush to 1-1/2" raised**. Integral adapter mounts to either open or closed sides of a wall stud. Available in red powder coat finish or galvanized steel.

Mounting between wall studs? Order the [Pre-assembled SSB-T5 with FA-UMAB](#) (FA-SSB-UMAB).

Mounting between drop-ceiling grids? Order the [Pre-assembled SSB-TBAR with FA-UMAB](#) (FA-TBAR-UMAB)

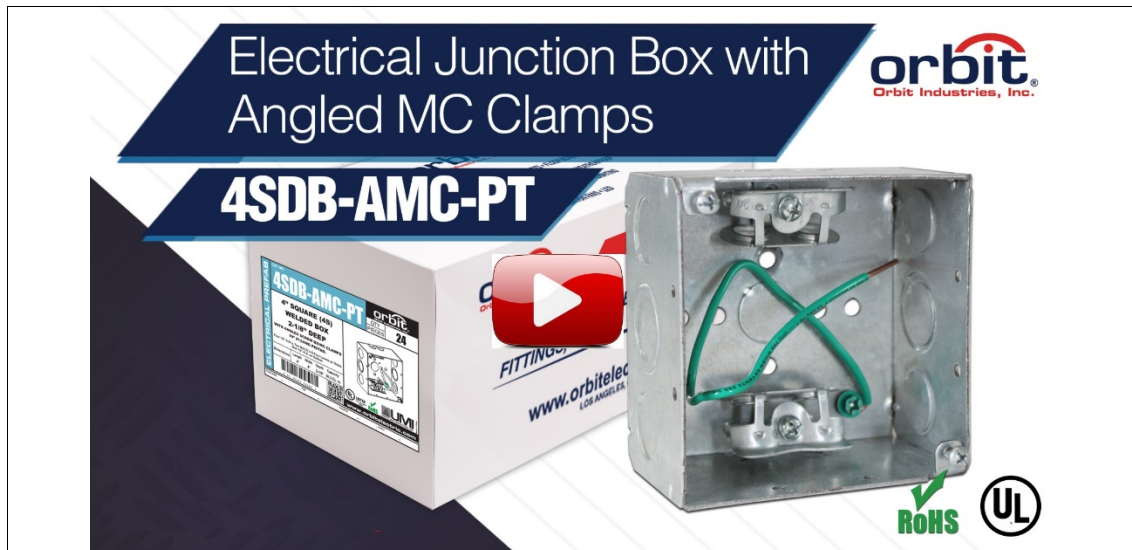

True 5" Square Junction Boxes (T5B Series)

Orbit [True 5" Square Junction Boxes](#) (T5B Series) give you an **unprecedented 75.6 Cu. In. of internal volume**. Ample interior helps meet minimum cable bend radius requirements for datacom cable, and leaves plenty of room for future upgrades.

Mounting between wall studs? Order the [Pre-assembled SSB-T5 with True 5" Square Box](#) (SSB-T5B-200). Includes UMA-LVBS adapter, 5" Box and pre-installed 8-32" screws, ready to take a 4" ring or cover.

Junction Box with Angled MC Clamps (4SDB-AMC-PT)

Orbit's [Junction Box with Angled MC Clamps](#) (4SDB-AMC-PT) is a 4" square, 2-1/8" deep outlet box with patented internal MC clamps. Unique MC clamp screws are set at a 15° angle, enabling cable **securement with the device ring attached**. The 4SDB-AMC-PT also features a re-located ground screw, so you can mount onto nearly any type of box bracket.

Mounting between wall studs? Order the [Pre-assembled SSB-T5 with 4SDB-AMC-PT](#) (SSB-A4).
